(a) no exclusion zones
cells 1 · L 112.0 m · E 1.48 Wh
(b) two exclusion zones
cells 6 · L 114.4 m · E 1.60 Wh
(c) sensitivity to obstacle position
y [m]
x [m]
change vs. no exclusions [%]
obstacle shift Δy [m]
energy
path length
energy, no span merging
